Coming soon!

# ProViu™ ASL360

Four Fisheye Cameras

ECU

## Features:

- Four-Camera Surround View Driver Assistance enables the driver to see 360° around the boat/yacht on display.
- The surroundings can be seen top-down from a bird's eye view perspective. Such a view eliminates blind spots during critical and precise manoeuvres in different situations.
- Input images from the cameras are processed and stitched together in 360° bird-view of the boat/yacht surroundings
- Genuine real time delivery at 30fps
- Flexible SW tool chain (e.g. multiple screens, configuration, custom user interface etc.)
- Wide angle fisheye cameras

Example: [https://www.youtube.com/watch?feature=player\\_detailpage&v=LwQCUEud2ZY](https://www.youtube.com/watch?feature=player_detailpage&v=LwQCUEud2ZY)

# Viewline Gauges Index

Description	Notes	Diameter	Page
<b>Viewline Gauges Introduction</b>			4 - 10
<b>Navigation Gauges - Wind</b>	Wind Speed & Direction , Close Haul	80/85mm	11
<b>Navigation Gauges</b>	Depth Sounder - Solog - Compass	80/85mm	12
<b>Tachourmeter</b>	Tachourmeter 3000, 4000, 5000, 6000 RPM	80/85mm	13
<b>Tachometer</b>	Tachometer 3000, 4000, 6000 RPM	80/85/52mm	14
<b>Synchroniser</b>	+ / - 500 RPM	80/85mm	14
<b>Temp Gauge</b>	Water, Oil, Transmission	52mm	15
<b>Pyrometer</b>	Exhaust Temp 100°C to 900°C	52mm	16
<b>Temp Gauge Outside</b>	Air Temp -25° to +50°C	52mm	17
<b>Pressure Gauge</b>	Turbo, Oil, Transmission	52mm	17 - 19
<b>Fuel Level Gauge</b>	Float Arm Type	52mm	20
<b>Fuel Level Gauge</b>	Reed Switch Type	52mm	21
<b>Fuel Level Gauge</b>	Tubular Type	52mm	22 - 23
<b>Fuel Level Gauge</b>	US Lever Type 240 - 33 Ohms	52mm	24
<b>Fresh Water Level Gauge</b>	Capacitance & Reed Switch Type	52mm	25
<b>Waste/Grey Water Gauge</b>	4-20 mA	52mm	26
<b>Hourmeter</b>	Engine Hours	52mm	26
<b>Voltmeter</b>	Battery Voltage	52mm	27
<b>Ammeter</b>	Ampere Meter 60 A and +150 A	52mm	27
<b>Trim Gauge</b>	Outboard Engine Trim	52mm	28
<b>Rudder Angle Gauge</b>	Rudder Position	52/80/85mm	28
<b>Clock</b>	Real Time Clock	52mm	28
<b>Multifunction Gauges</b>	Tacho./Trim, Press. Fuel, Volt, Temp	110 mm	30 - 31
<b>Sensors</b>	Various sensors		32 - 36
<b>Electrical Diagrams</b>	Gauges connection (power and signals)		37 - 57
<b>Gauges Accessories</b>	Bezels - Plugs & Terminals - Tools		58 - 61
<b>Fitting Instructions</b>	Conventional & flush mount fittings		62 - 67
<b>Calibration Instructions</b>	Speedo, Tachourmeter & Tachometer		68 - 75

## LCD display.

As well as having an analogue indication (speed or engine revs), the new Viewline tachometer and speedometer instruments have an additional digital display:

- ▶ Display size 37 mm x 11 mm
- ▶ Quick and reliable retrieval of other data
- ▶ Optimum reading angle and representation on the display
- ▶ Display with speed or engine revs (option)
- ▶ Further monitoring functions available on the LC display (e. g., battery, temperature, mileage indicator, etc.)
- ▶ Individual function selection via external button

## Full backlight technology.

The dials and pointers of all Viewline instruments feature full backlight technology:

- ▶ Optimum contrast and superb readability of the display when lit
- ▶ Attractive display appearance at night thanks to clearly structured dial design

## Combi and multifunction gauges\*.

Now, in addition to the tried and tested standard solutions, Viewline also offers OEMs the option of installing multifunction devices:

- ▶ 85 mm combi devices, analogue and / or digital representation of speedometer and tachometer signals (OEM solution)
- ▶ 110 mm multifunction devices, such as 4-in-1, 2-in-1\*
- ▶ Integration of up to five display / warning lights (OEM solution)

## Signal inputs.

Viewline offers the following options for the signal inputs:

- ▶ NMEA 0183 data input for all navigation instruments
- ▶ Standard tachometer and speedometer signals
- ▶ Second frequency input (option)
- ▶ Standard signals for engine monitoring and on-board power supply
- ▶ Signal inputs for special sensors (option)
- ▶ Up to five usable switching inputs for control / warning lights within the OEM version (option)

## Programmable displays.

Viewline enables the user to use different setting and programming options:

- ▶ Basic setup via dip switches, external button or a PC software package
- ▶ Setup of various display functions via external button

VDO

# Introducing VDO Viewline

Our engineers started with a clean sheet of paper and a worldwide view to create an instrument line like no other in today's market.

Their goal to create an instrument with flexibility, class and integrity something you've come to expect from VDO.

It begins with a fresh style and three choices of instrument sizes 100mm, 85mm and 52mm.

For styling, you have a choice of dial face colors of Black or White.

Next we added three choices of bezel styles along with two choices of bezel colors, white, black and chrome.

To complete your choices we give you three choices of instrument sizes 100mm, 85mm and 52mm giving you more flexibility than ever to create the instrument you are looking for.

They did not stop with just a pretty face, next they added integrity.

With the use of fully sealed dual lens, lifetime LED lighting and warning indicators assure you that Viewline can withstand even open cab environments easily.

Whether you are looking for standard or customized products, you are truly getting "more bang for your buck" with Viewline.

The VDO Heritage: **Reliability, durability and accuracy.**

## Reliability

- IP67 water resistance means, that no matter how wet it gets, our gauges keep on working.
- Anti-corrosion materials mean no oxidation or rust will develop – Viewline will continue to work and look like new.

## Durability

- CE certification.
- GL registered.
- UL94 flame resistance.
- Tested to 25 G continuous vibration and 100 G shock.
- 100% LED warning lights and telltales for long service life.

## Accuracy

- VDO patented stepper motors and resistive movements.
- OEM derived technology in every instrument.

# Viewline Gauges

Viewline is the new standardised instrument platform for pleasure boats and yachts. With modular solutions in three housing variations, we supply more functions, more flexible installation and design options as well as space-saving combi instruments – something unique in this sector.

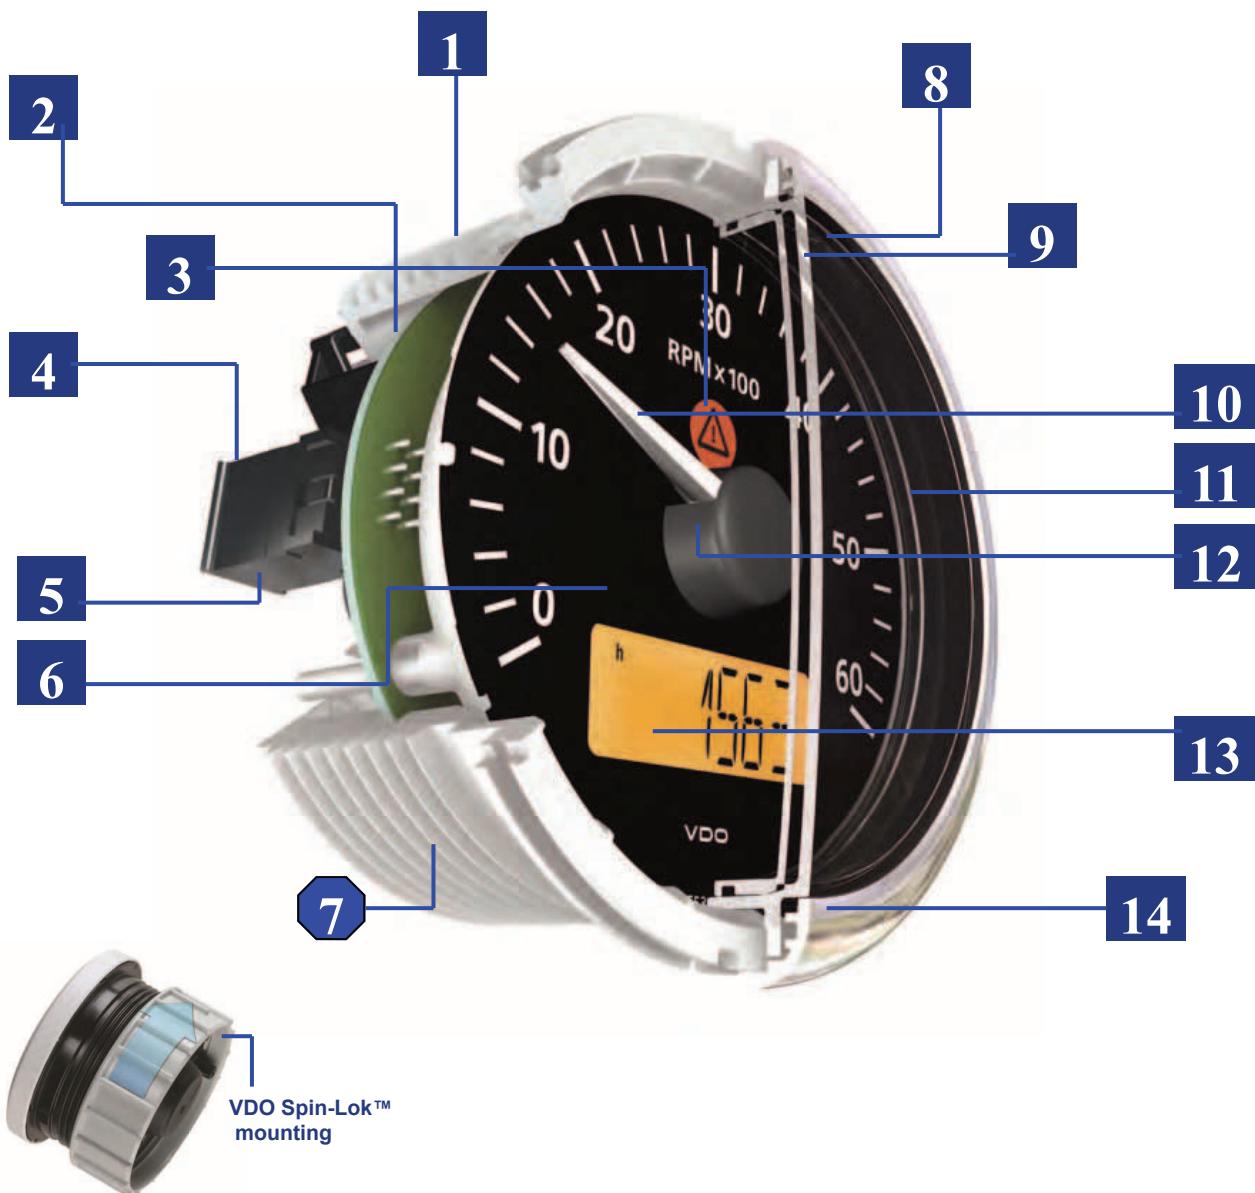

All Viewline instruments can be conveniently mounted in the instrument panel.

Here, it is possible to use the modular bezels for installation as well as integrating the instruments flat without the bezels (flush installation).

This allows maximum flexibility in cockpit customisation and numerous design variants.

# Viewline Gauges

1. Spin-Lok mounting – a VDO innovation developed to safeguard against mounting panel warping and makes fast installation.
2. Single PCB increases reliability and minimizes instrument depth.
3. Built-in LED warning indicator (up to 5) is programmable to OEM-specified function.
4. Single cavity connectors reduce wiring installation time.
5. Reverse polarity and over voltage protection virtually eliminate the possibility of installation failures.
6. VDO is one of the few companies in the world to design, patent and manufacture stepper motors and resistive movements.
7. Corrosion-free and flame retardant materials comply with manufacturer's latest specifications.
8. Laser welded lenses ensure the highest level of protection against water intrusion.
9. Dual domed lenses eliminate fogging – another VDO innovation.
10. LED lit pointers and "through dial lighting" minimize current consumption while optimizing nighttime viewing."
11. Detail finish ring enhances the overall appearance of finished instrument – a VDO exclusive.
12. Designed to withstand continuous 25 G vibrations and 100 G single shock, to ensure maximum reliability of each instrument.
13. Large, multifunction backlit LCD provides easy readout of programmed functions.
14. Customer installed bezels with nine style choices allow for greater styling differentiation between product lines.

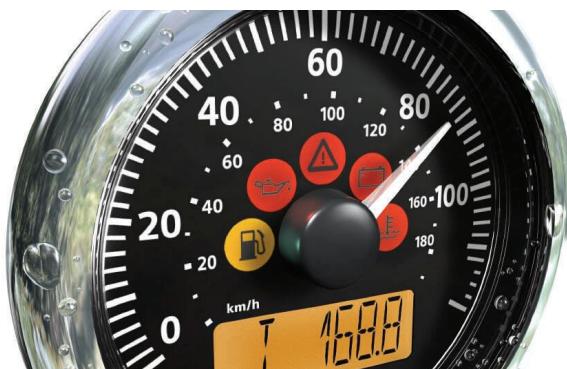

**VDO**

# Viewline Gauges

Benefiting in the long-term from new technologies In developing the Viewline instrumentation, we have paid attention to the requirements of manufacturers.

With Viewline, we have created a platform-wide standard with which we offer maximum freedom in respect of cockpit design.

## Highly visible LED warning and indicator lights

Viewline instruments are fitted with highly visible, high intensity LED warning and indicator lights.

They ensure that critical operating conditions can be quickly and safely detected.

## Clip-on bezel

The modular bezel concept offers design flexibility in the layout of instrument panels.

Three attractive design variants in black, white or chrome perfectly complement any boat's interior.

Furthermore, bezels are available in flat, round and triangular versions. All available bezels can be combined with all devices.

A2C59512459	White	18 - 32V	24V

## Ammeter Gauge with external shunt

Ø 52 mm

Part Number	Colour Dial / Bezel	Range	Voltage
A2C59512328	Black	60A	12/24V
A2C59512330	White	60A	12/24V
A2C59512329	Black	150A	12/24V
A2C59512331	White	150A	12/24V

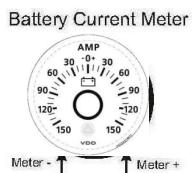

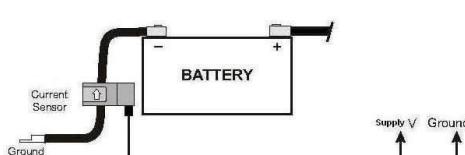

Note: Above Gauge does not include the Shunt, Harness and Mounting Bracket

Order parts below to complete the kit:

## Ammeter Shunt

Part Number	Range / Description	Voltage
UK-UE-157	60A	12/24V
UK-UE-094	150A	12/24V
UK-UE-184	Shunt Harness	
UK-UE-188	Universal Mounting Bracket Kit	

### SENSOR Specs

Sensor Type: Open loop Hall-Effect  
 Linearity: 1.5%  
 Supply Voltage Range: 12/24V  
 Current Consumption: 8.1 mA max  
 Output to Gauge: + - 60 mV  
 Operating Temp: 40°C to + 125°C  
 Storage Temp: 40°C to + 125°C  
 Aperture size: 31.24 mm  
 Weight: 0.136 Kg  
 Connector: Packard sealed Metri-Pak 150  
 Note: Mating plug not supplied with sensor

# Trim & Rudder Angle

**VDO**

## Trim Gauge

Ø 52 mm

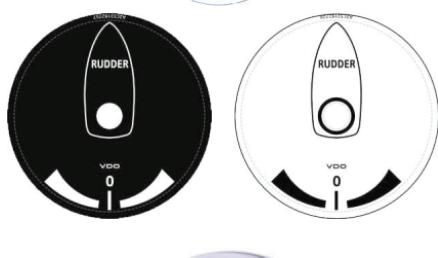

Part Number	Colour Dial/ Bezel	Range	Voltage
A2C59514180	Black	Bravo Drive	12/24V
A2C59514244	White	Bravo Drive	12/24V

A2C59510173	Empty = 5 - Full = 90	145 - 400 mm	54 mm

An economical and practical solution for fuel monitoring for tank depths from 140mm to 400mm

Engineered with a redundant dual wiper system, our unique VDO 'quiet arm' and thick film technology, this new VDO fuel sender leads the field in reliability and durability.

In fact, this family of senders has the ability to withstand over one million swing arm cycles without failure. ALAS I senders feature our unique slotted SAE five-hole flange mount, an industry first that gives you the utmost in versatility for sender mounting positions. Three resistance values are available, 10-180 ohm, 240-33 ohm & 90-0 ohm. ALAS I senders are available with an optional low fuel warning contact circuit found in no other universal

1. Available with low fuel warning contact.
2. Redundant ground connection.
3. Unique SAE 5-hole slotted mounting plate allows for positioning sender for left or right hand applications.
4. Stainless steel float arm and pivot adjusts from 140mm to 400mm.
5. "No sink" solid float.
6. VDO thick film element with 39-step resolution.
7. Redundant dual wiper system.
8. 'Quiet arm' minimizes float movement.

## Clock wiring diagram

## Hourmeter wiring diagram

The hourmeter can be connected to a 12V supply, as follows:

**Option A**  
to Ignition + (Note: If ignition power is let "on" and the engine is "off", the hourmeter will record engine time, incorrectly)

**Option B**  
to an oil pressure switch (Normally "Off" contact).

**Option C**  
to the alternator, terminal "D+"

# Warning Lights

## Electronic Alarm Switch

The Electronic Alarm Switch p/n A2C59510886 is designed to trigger the gauge's warning light at a pre-set point. It can be used on tank low level, high temp, low pressure, trim and rudder-angle. The unit has a pre-wired plug for the Viewline gauges.

It operate on VDO and other manufactures (resistive) sensors.

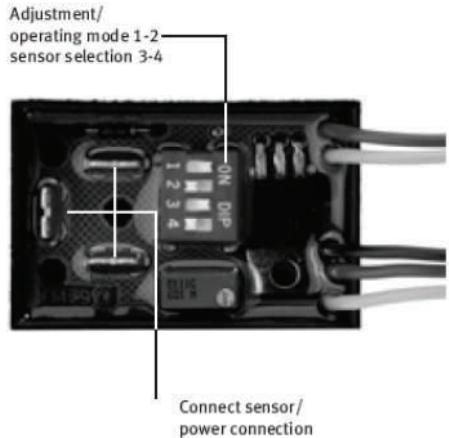

### Specification and technical data:

- Power supply: 12VDC or 24VDC
- Power consumption: < 10mA (warning lamp off)
- Operation temperature: -20°C to +70°C
- EMC: CE according to EMC Law89/336/EEC
- Vibration resistance: max. 1g effective 25 Hz – 500Hz (duration 8 hours)
- Shock: 15g 1,5 ms half sine

Ø52mm gauges: Can be used on Temperature, Pressure, Tank, Trim, Rudder-angle.

Ø85/110mm: for optional warning lamps (Temperature, Pressure, Tank).

P/n 660.990

Over-Rev switch with single channel

The VDO RPM Switch has been designed to work with all standard ignition systems, and will provide a negative output once a predetermined RPM has been reached. In standard format the signal will turn off once the RPM falls below the pre-set point. Dip Switches are provided to program the level of hysteresis, or alternatively latch the relay on. Applications include driving a warning light or buzzer. Compatible with VDO Mega Light 600.895. 12V applications.

Switch Box 660.990

P/n 410.060

One channel, relay output warning switch

This module is designed to switch a 3A contact, in-build relay, at a preset voltage level. It can be used for thermatic fan, low fuel, high temp, low engine oil / transmission pressure, etc. alarm. The module can be connected to an existing sender/gauge or only to a sender.

12/24V

P/n 410.061

Three channels, warning switch

This module is designed to monitor three separate functions, by controlling three 1A transistors to switch negative when the pre-set alarm threshold is reached.

It can be used to monitor/control thermatic fan, low fuel, high temp, low engine oil / transmission pressure, etc. The module can be connected to an existing sender/gauge or only to a sender.

12/24V

VDO

## Signal Amplifiers, Multiplier & Dividers

P/n 411.110

### Signal interface

The VDO Signal Amplifier/Divider is a general purpose module designed to convert the signal from square wave to sine wave and vice versa.  
It can divide as well as multiply the frequency in small steps up to three times plus or minus.  
Ideal for calibrating electronic boat speedo or tachometers.

12/24V

P/n 410.020

### Tachourmometer active signal filter

The VDO active filter can reduce the effect of electrical noise mixed with signal.  
This is in situation when the electrical interference is excessive and the speedo or tacho have a pointer fluctuation (erratic reading).  
Inputs: **Red** Battery +12/24V, **Orange** Ignition + 12/24V, **Green** Signal Input, **Blue** Signal Output  
Note: Connector IN & OUT made to suit the VDO, Vision & International Tachourmometer

12/24V

P/n 411.096

### Tachometer inductive sender, signal amplifier/Frequency Divider

The VDO Signal Amplifier/Divider is a general purpose module designed to work with most speedometer and tachometer signals. This box will amplify a low voltage signal to a 10V peak to peak square wave. This can be useful when a signal is too low to drive a speedometer, tacho, cruise control or any other such device. The signal may also be divided in frequency by a factor of 1, 2, 4, 8 or 16 to allow easier integration to another instrument.

12/24V

P/n 411.101

### Over-Rev switch with two independent channels

A microprocessor controlled electronic switch module that can be programmed for a number of different functions. With two separate signal inputs switching two separate 5A relays contact the module can be a number of functions' combination. RPM, Speed Shaft rotation monitoring.

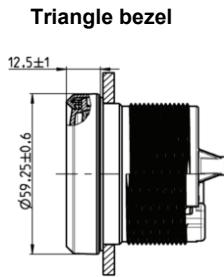

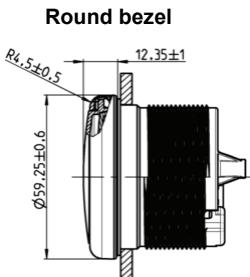

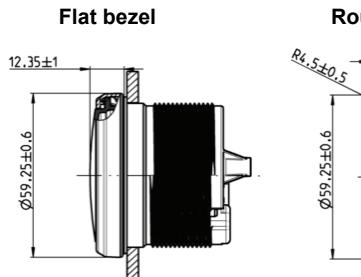

12/24V

## Sumlog

### Technical Data

Measurement Range:	see Table
Sensors:	Sumlog SL/HS Sensor, Airmar Triducer® NMEA 0183
LCD-Size:	37 x 11 mm
Alarm output max:	100mA
Illumination:	amber, dimmable
Installation depth:	50mm
Installation diameter:	80 & 85mm
Deflection angle:	240°
Operating Voltage:	8.5 – 32 Volt (Sensor 8 – 16V)
Accuracy:	+/- 2.5% of full scale reading
Current consumption:	< 175 mA, including Warning LED
Operating temperature:	-20°C to +85°C; plated bezels (chrome) -20°C to +70°C
Storage temperature:	-40°C to +85°C for 48h; plated bezels (chrome) -40°C to +70°C
+90°C for 1h	
Temperature shock Range:	-40°C to +85°C; plated bezels (chrome) -40°C to +70°C
Transformation time:	10 seconds
Retention time:	2h
Climatic test Range:	+25°C to +55°C
Relative. Humidity:	80% to 100%
EMC:	in conformity with ISO 7637-1/2
ISO:	7637-3
ESD:	in conformity with DIN_EN 61000-4-2
ISO/CD:	10605
SAE:	J 551/15
Vibration Sinus:	2g; 8-500Hz; duration 16h
Noise 4.2g; 10-1000Hz, duration 8h	
Mechanical shock continuous 25g; 6ms; 1Hz	
Single shock 100g; 11ms	
Free fall 1m; 3 times	
Chemical resistance against - preservative agent	
- preservative agent remover	
- cold cleaner	
- methylated spirit	
- interior cleaner	
- drinks containing caffeine and tannin	
Nominal position NL 0 to NL 85 (DIN16257)	
Protection class according to IEC 60529	
Front: IP67 (in Nominal position)	
Rear: IP52 (in Nominal position)	
Reverse polarity protection yes, 1 minute	
Short circuit protection yes, 1 minute	

### Features

High reliability  
Flush mount fitting  
LED illumination  
Integrated Warning LED

### Design

Housing PC; flame retarding (UL94)  
Bezel PC or ABS; several colours and shapes (see table)  
Lens PMMA; double lens  
Dial backlit; different colours (see table)  
Pointer backlit, white on black dials; red on white dials  
Illumination Dial: LED amber (605nm)  
Pointer: LED red (632nm)  
Warning LED red (632nm), programmable  
Mounting spin-lock Nut; locking height 0.5mm – 20mm,  
optional Studs and Bracket; locking height 2 – 13mm  
Connection 8 pin MQS connector system

## Tachourmeter

## Press. - Temp. - Fuel - Trim - Ammeter - Volt - Pyro – Water

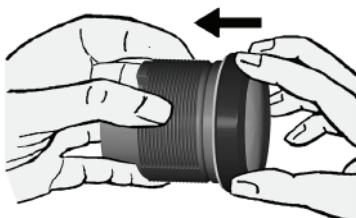

### Technical Specs

- 8 pole Tyco/Hirschmann MQS plug
- +/-3,6 ° angle degree accuracy over the entire display area
- Operating voltage 10–16 volt, 16–32 volt with dropping resistor
- Current consumption < 130 mA with LED warning light
- Reverse polarity protection
- Input signal: standard Ohm values
- 90 ° display angle
- 52 mm installation diameter
- Anti-fog double lens
- Front panel in compliance with IP 67 protection rating
- Red LED warning light
- Optional makepoint

## Fitting ø 52 mm gauges

### To replace a bezel

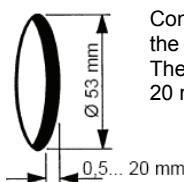

- Place the new front ring on the instrument and press it on until it is flush with the instrument glass.

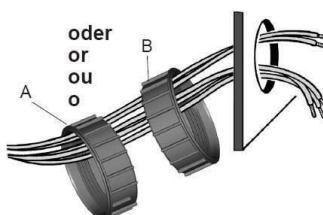

Front ring, flat; black	A2C53186040
Front ring, flat; white	A2C53186022
Front ring, flat; chrome	A2C53186023
Front ring, triangular; black	A2C53186024
Front ring, triangular; white	A2C53186025
Front ring, triangular; chrome	A2C53186026
Front ring, round; black	A2C53186027
Front ring, round; white	A2C53186028
Front ring, round; chrome	A2C53186029

### To cut and fit gauge Ø52mm

Conventional assembly. (Instrument is put into the drill hole from the front).  
The panel width may be within a range of 2 to 20 mm.

For 52 mm instruments, the fastening nut can be mounted at position A or B. This allows you to fix the gauge in different panel bores.

**Version A**  
Clamping height 0.5 – 10 mm

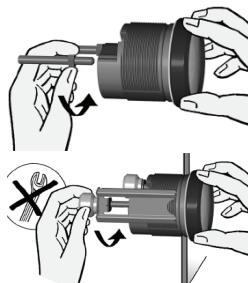

**Version B**  
Clamping height 0.5 – 20 mm

Align the instrument and hand-tighten the fastening nut. Ensure that the nut is not tightened with a torque greater than 400 Ncm.

\* Make sure the seal lays flat between the panel and the front ring.

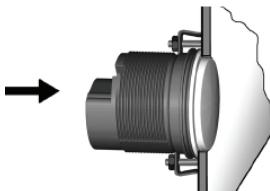

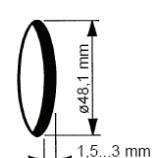

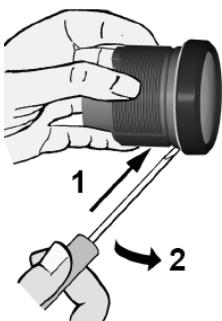

OR

If you would like to omit the fastening nut, you may use the part set A2C59510854 as an alternative. This is recommended if the installation location is subject to vibratory loads. Screw the stud bolts into the provided drill holes in the enclosure. Max. stud bolt torque is 1.5 Nm.

Place the bracket on the stud bolt and hand-tighten the knurled nut.

### To cut and fit gauge Ø52mm flush mount

- If the instrument is mounted flush (i. e., from the back so that the instrument glass and the panel form one plane), the front ring must be removed.

Press the instrument glass with both thumbs, while at the same time pressing the front ring forward from the instrument with both index fingers. Note the use of a tool in the adjacent figure.

- Place the flush mount seal A2C53215640 on the instrument glass.

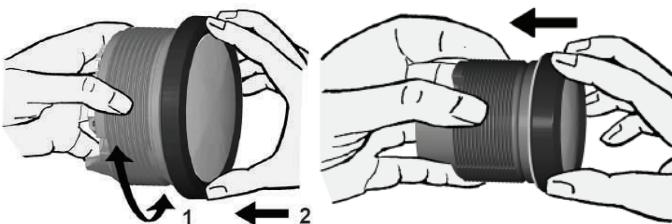

Put the instrument into the drill hole from the back. Adjust the instrument so that the gauge is level and fasten it to the stud bolts on the rear side of the panel, using the flush mount fixing bracket A2C59510864.

# Gauge Fittings

VDO

## Fittings ø 85mm gauges

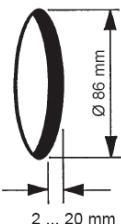

### To replace a bezel

- Place the new front ring on the instrument and press it on until it is flush with the instrument glass.

### To cut and fit gauge Ø85mm

Conventional assembly. (Instrument is put into the drill hole from the front).  
The panel width may be within a range of 2 to 20 mm.

Align the instrument and hand-tighten the fastening nut. Ensure that the nut is not tightened with a torque greater than 400 Ncm.  
\* Make sure the seal lays flat between the panel and the front ring.

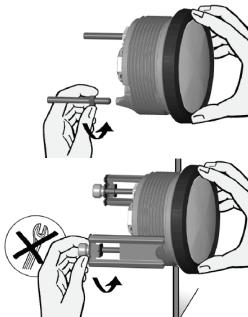

For 85 mm instruments, the fastening nut can be mounted at position A or B. This allows you to fix the gauge in different panel bores.

**Version A Panel bore 80.5 - 81 mm**  
Circumferential lip away from instrument

**Version B Panel bore 85.5 - 86 mm**  
Circumferential lip next to instrument

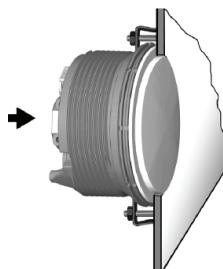

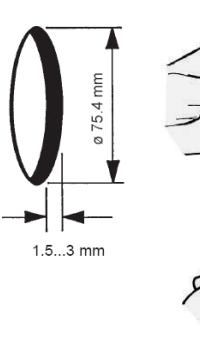

OR

If you would like to omit the fastening nut, you may use the part set A2C59510854 as an alternative. This is recommended if the installation location is subject to vibratory loads. Screw the stud bolts into the provided drill holes in the enclosure. Max. stud bolt torque is 1.5 Nm.

Place the bracket on the stud bolt and hand-tighten the knurled nut.

### To cut and fit gauge Ø85mm flush mount

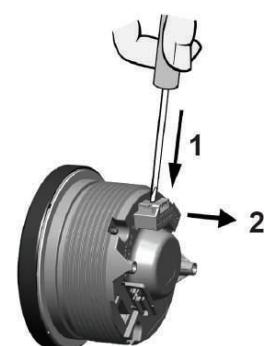

- If the instrument is mounted flush (i. e., from the back so that the instrument glass and the panel form one plane), the front ring must be removed.

Press the instrument glass with both thumbs, while at the same time pressing the front ring forward from the instrument with both index fingers. Note the use of a tool in the adjacent figure.

- Place the flush mount seal A2C53215641 on the instrument glass.

Put the instrument into the drill hole from the back. Adjust the instrument so that the gauge is level and fasten it to the stud bolts on the rear side of the panel, using the flush mount fixing bracket A2C59510864.

### To unplug connector

To remove the connector, press the latch (1) and pull the connector out (2).

Note: Ø 110 Gauges require a panel bore of Ø 111 mm.  
Panel width may be within a range of 2 and 20 mm  
Flush mount seal is p/n A2C53215642

## Sumlog Calibration

### Calibration for:

- Hall Effect Output Transducer

For NMEA Transducer Change "Input" to NMEA. No pulse calibration needed.

- ◆ Press the key briefly (< 2sec.) to change the currently displayed value.
- ◆ Press the key longer (< 2sec.) to change to the next value.  
The display returns to normal operating mode (if a key is not pressed for 30 seconds. Any settings

### To enter calibration mode

- ◆ Press and hold Configuration Key

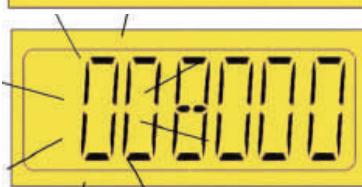

Press the Config key to change over between the "Frequency" input (8 pole plug pin 5) and the NMEA0183 input (14 pole plug, pin 1 & 2)

- ◆ Press Configuration Key briefly

- ◆ Press and hold Configuration Key

Set impulses number is displayed.  
The first digit flushes.

- ◆ Press Configuration Key briefly

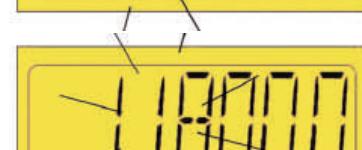

The flushing digit increases by 1.  
If the flushing digit is "9", the display returns to "0".

- ◆ Press Config key briefly

The next lower digit flushes

- ◆ Press Config key briefly

Deactivate Ignition power.  
This saves the impulse number in the display.  
Continue until the complete impulse number is set

- ◆ Press and hold Config key

Deactivate Ignition power (T15).  
This saves the impulse number in the display.

## Sumlog Alarm Threshold

### Setting of unit and Alarm Threshold

- ◆ Battery Power **On** T. 30 (8-pin - Pin1)
- ◆ Ignition Power **Off** T. 15 (8-pin - Pin4)
- ◆ Press and hold Mode key (14-pin - Pin 12)

- ◆ Ignition Power **On** T. 15
- ◆ Release Mode key
- ◆ Press and hold Mode Key

By briefly pressing the Mode key, you can switch between 24h and 12h (AM/PM) clock format.

- ◆ Press and hold Mode key
- Press the Mode key to change the water temperature unit from °C to °F.
- ◆ Press and hold Mode key
- Press Mode key briefly to change the water depth unit from m to ft.
- ◆ Press and hold Mode key
- ◆ Press and hold Mode key

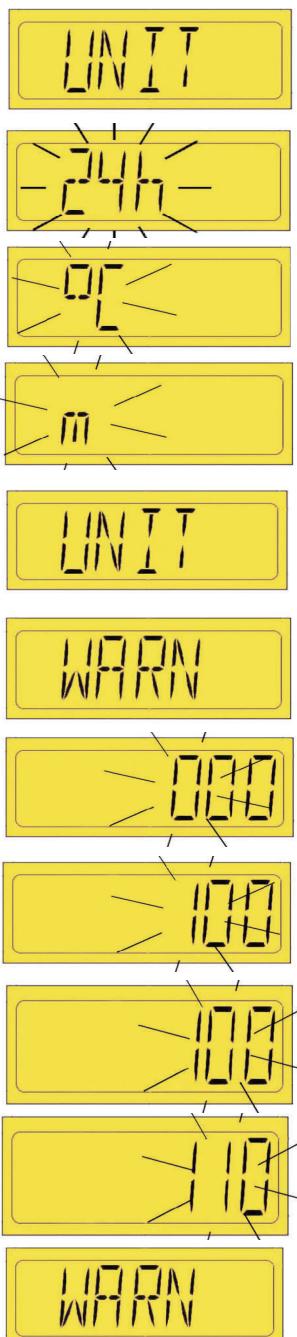

Set alarm threshold is displayed; the first digit flushes.

- ◆ Press Mode key briefly
- The flushing digit increases by 1. If the flushing digit is "9", the display returns to "0".
- ◆ Press and hold Mode key
- The next lower digit flushes in the display.
- ◆ Press Mode key briefly

The flushing digit increases by 1. If the flushing digit is "9", the display returns to "0".  
Continue until the complete alarm threshold is set.

- ◆ Press and hold Mode key

Switch **Off** Ignition power (T15).  
This saves the unit and the alarm threshold in the display.

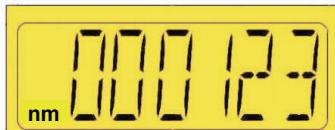

## Sumlog Operation

### Display Selection

- ◆ Switch **On** Battery Power T. 30 (8-pin - Pin1)
- ◆ Switch **On** Ignition Power T. 15 (8-pin - Pin4)

Odometer

- ◆ Press and hold Mode Key

Tripmeter

- ◆ Press and hold Mode key

Depth

- ◆ Press and hold Mode key

Time

- ◆ Press and hold Mode key

Water temperature

- ◆ Press and hold Mode key

Battery voltage

### Resetting Trip Counter

- ◆ Switch **On** Battery Power T. 30 (8-pin - Pin1)
- ◆ Switch **On** Ignition Power T. 15 (8-pin - Pin4)

Press the Mode key repeatedly until the trip distance are displayed.

- ◆ Press and hold Mode key

- ◆ Trip is now deleted

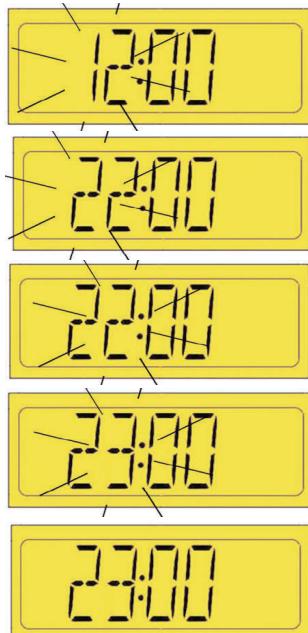

# Speedometer

VDO

## Sumlog Clock & LCD Brightness Function

### Setting the Clock

- ◆ Battery Power **On** T. 30 (8-pin - Pin1)
- ◆ Ignition Power **On** T. 15 (8-pin - Pin4)
- ◆ Press the Mode key repeatedly until the time is displayed
- ◆ Press and hold Mode key

Set time is displayed; the first digit flushes.

- ◆ Press Mode key briefly

The flushing digit increases by 1. If the flushing digit is "9", the display returns to "0"

- ◆ Press and hold Mode key

The next lower digit flushes.

- ◆ Press Mode key briefly

The flushing digit increases by 1. If the flushing digit is "9", the display returns to "0".

Continue until the correct time is set

- ◆ Press and hold Mode key

### Setting the Brightness

- ◆ Battery Power **On** T. 30 (8-pin - Pin1)
- ◆ Ignition Power **On** T. 15 (8-pin - Pin4)
- ◆ Press the Mode key repeatedly until the Voltmeter is displayed.

- ◆ Press Mode key briefly

- ◆ Press the Mode key repeatedly until the desired brightness is reached. The brightness can be set between 0 (OFF) to 10 (max).

- ◆ Press and hold Mode key

- ◆ The desired brightness is now permanently set.

## Tachourmeter Calibration

### Setting impulses / revolution

- ◆ Battery Power **On** T. 30 (8-pin - Pin1)
- ◆ Ignition Power **Off** T. 15 (8-pin - Pin4)
- ◆ Press and hold Configuration key (14-pin - Pin 12)

### To enter calibration mode

- ◆ Ignition Power **On** T. 15
- ◆ Release Configuration key

- ◆ Press and hold Configuration Key

Set impulse number is displayed, the first digit flushes.

- ◆ Press Configuration key briefly

The flushing digit increases by 1. If the flushing digit is "9", the display returns to "0"

- ◆ Press and hold Configuration Key

The next lower digit flushes

- ◆ Press Configuration Key briefly

The flushing digit increases by 1.  
If the flushing digit is "9", the display returns to "0".  
Continue until the complete impulse number is set

- ◆ Press and hold Configuration Key

Deactivate Ignition power T.15  
This saves the impulse number in the display.

Disconnect and reconnect the 8 Pin Plug once the calibration is done.

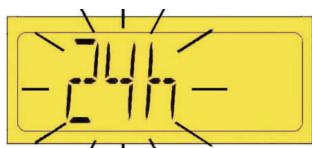

## Tachourmeter Calibration

### Setting the unit and alarm threshold

- ◆ Battery Power **On** T. 30 (8-pin - Pin1)
- ◆ Ignition Power **Off** T. 15 (8-pin - Pin4)
- ◆ Press and hold Mode key (14-pin - Pin 12)
- ◆ Ignition Power **On** T. 15
- ◆ Release Mode key

- ◆ Press and hold Mode key

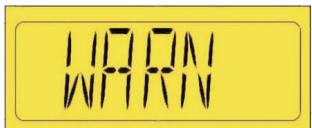

By briefly pressing the Mode key, you can switch between 24h and 12h (AM/PM) clock format.

- ◆ Press and hold Mode key

- ◆ Press Mode key briefly

- ◆ Press and hold Mode key

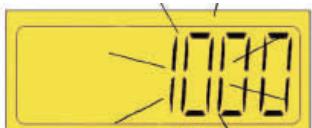

Set alarm threshold is displayed; the first digit flushes.

- ◆ Press Mode key briefly

The flushing digit increases by 1. If the flushing digit is "9", the display returns to "0"

- ◆ Press Mode key briefly

Set alarm threshold is displayed; the first digit flushes.

- ◆ Press Mode key briefly

The flushing digit increases by 1. If the flushing digit is "9", the display returns to "0"

- ◆ Press and hold Mode key

Ignition Power **Off** T. 15.

This saves the unit and the alarm threshold in the display.

## Tachourmeter Calibration

### In operation

#### Display indicator selection

- ◆ Battery Power **On** T. 30 (8-pin - Pin1)
- ◆ Ignition Power **On** T. 15 (8-pin - Pin4)

Total operating       hours

- ◆ Press Mode key briefly

Trip hours      

- ◆ Press Mode key briefly

Time

# Warranty Policy

Continental Pty Ltd (VDO) warrants the goods against defects in factory workmanship and materials within the warranty period.

The warranty period for automotive, commercial and marine products shall be 24 months from the date of invoice, subject to the usage limitation of 100,000 Km for goods installed in commercial vehicles.

The warranty period for audio and navigation products shall be 24 months from date of invoice.

The warranty period for repaired items shall be 90 days from the date of invoice.

The customer must notify the point of purchase / distributor of any defect coming within the provisions of this warranty within 30 days of the fault occurring.

A copy of the relevant invoice or the relevant invoice number as proof of the date of purchase must be provided with returned goods.

Continental P/L (VDO) liability with respect to this warranty shall be limited at the option of Continental P/L (VDO) to repair or replacement of the goods.

Removal and refitting costs and all freight costs associated with the warranty claims are the responsibility of the customer.

This warranty shall not apply to goods which have been opened by a third party. Contaminated by oil, water or grease, fitted in excessive vibration environments or improperly connected.

Glass and capillary breakages are excluded from the provisions of this warranty.

Save and except for the express warranty set out above and to the maximum extent permitted by law, all conditions and warranties which may at the time be implied by common law, Trade Practices Act, Fair Trading Act, Goods Act or any other state or Federal Act are excluded.

To the extent that these cannot be excluded and where the law permits.

Continental's liability in respect of any such condition or warranty, shall be limited at the option of Continental P/L (VDO) to repair or replacement of the goods or the supply of equivalent goods or the payment of the costs of the replacing or repairing the goods, or having them replaced or repaired.

Flavio 07022014
